WORK EXPERIENCE

Software Engineer | *CentraLogic, Pune (joined as Trainee Jan 2024, promoted Jun 2024)* **Jan 2024 – Present**

- Develop and maintain Java Spring Boot microservices exposing REST APIs, with Hibernate/JPA data access on PostgreSQL and Spring Security for authentication and authorization.
- Implement event-driven communication between services using Apache Kafka, and write JUnit unit and integration tests for the service and API layers.
- Build secure Node.js and Express.js backend services on AWS (including AWS Lambda) with PostgreSQL and REST APIs, powering critical features such as real-time driver tracking with Google Maps API.
- Integrated LLM APIs (OpenAI, Claude, Gemini) into product features; delivered 20%+ performance gains.
- Built CI/CD pipelines with AWS Amplify and CodeMagic that cut deployment time by 20%; introduced AI-assisted development workflows (Claude, Cursor, GitHub Copilot) that cut development time by 30%.
- Own release management and production support end-to-end; conduct peer code reviews and mentor junior engineers in Agile/Scrum practices.

Android Developer (Internship) | *RootKit Consultancy Services* **Jan 2023 – Apr 2023**

- Developed Android applications in Java/Kotlin; debugged issues, integrated backend APIs and optimized application performance.
